

# NAVIGATE LIFE

## A Guide To Our Pushchairs & Buggies

*There's lots of choice in the world of pushchairs and buggies. That's why we're committed to helping new and experienced parents find the ones that are right for them, their child and their lifestyle. From pushchairs designed to off-road to compact buggies perfect for holidays, we've got the lot.*

Pushchairs and buggies. You know you're going to need them. Yet often finding the one that's right for you can be as tricky as shopping around for a new car. Only, it's a new car you can take on public transport and that will fit easily through a shop doorway. It's no small feat, but it needn't feel overwhelming.

At Mamas & Papas, we're committed to helping you find the right pushchair or buggy. That way you can focus on parenting, navigating everything with ease and confidence.

As a family-run brand, we use our own personal experiences to inform everything we create. That's why we have a range of prams and strollers to meet your needs, whatever they be. Whether you prefer living life in the fast lane or fancy yourself a bit of an off-roader, we have a pushchair that's perfect for your family. They're full of ingenious features and helpful details. We do our best to ensure we've thought of everything, to make life as a parent is as simple as possible. And a big part of that is down to our compact one-hand fold.

### The Compact One Hand Fold | Our Signature Pushchairs & Buggies Fold

The majority of our pushchairs and buggies come with our unique compact one-hand fold.

We understand how frustrating it can be to fold away a pushchair. Often, you're trying to do it while juggling something else. Shopping, changing bags, a sleepy child – it all adds up. The last thing you need is a large, awkward fold that requires three hands and the strength of ten weightlifters.

Thankfully, our one-hand fold is just that – a fold you can perform with one hand. It's so quick and easy to do, you can operate it in seconds; folding away your pushchair with one hand, leaving the other free to do whatever else you need to do. The compact size means that it fits easily into the boot of most small cars. It's also ideal for storing away in your home.

### Trusted British Heritage | Pushchair & Buggies Designed & Tested in Yorkshire

All of our pushchairs and buggies are designed by our in-house designers, at our head office in the heart of Yorkshire. It's been that way since 1982. We use our own personal insights, along with feedback from a wide variety of parents, to inform everything we design, especially our pushchairs. We make sure they're easy to use and effortless, while remaining unbelievably comfortable and supportive for baby.

Our creations are completed and fine-tuned, then they are sent to our Independently Accredited Test Lab. This hub of testing, trialing and general putting-through-its-paces-ness sits onsite at our Head Office. Here, we test every chair to make sure they are compliant with the latest European Safety Standards. We make sure they're able to withstand the full-on nature of life with a little one.

Our pushchairs and buggies are designed and tested to handle the job.

### The Right Fit!

#### Newborn

Mamas and Papas pushchairs are ready from birth and come with a variety of modes to ensure baby is always comfortable.

Doubling as travel systems, they are compatible with car seats and carrycots, and offer the choice between baby facing you or out at the world.

#### Baby or Toddler

What you're looking for depends on the stage you're at.

A new parent will often look for the all-round travel system that's big, sturdy and does everything, whereas, someone with a toddler might be looking to downgrade to a smaller, more compact buggy. And we do both.

#### Toddler

Your little one might be older but they still need to get around, and sometimes a travel system is less than ideal.

Mamas & Papas' light, compact buggies come with a forward-facing seat, perfect for little ones ready to see more of the world.

### Helpful details that make life easier

We believe it's all in the detail and that those smaller touches make the biggest difference. Our pushchairs and buggies all come with standard features. They may not seem like much, but when you're in the thick of it, they can be lifesavers.

#### Lie Back Seat

Sleep in important for little ones, especially in that first couple of years. They spend more time sleeping than they do being awake. But just because they're napping, it doesn't mean everything comes to a halt. With our incredibly helpful lie back seats, you can create a flat-lying space for your child to sleep while on the go.

Once your baby has outgrown their carrycot, you can be sure they're getting the best sleep possible, and the flat design is best for supporting a more natural sleep. That means they can snooze away while you get on with everything else.

#### Magnetic Window

The urge to keep checking on your baby is always a strong one. Even when you know they are sleeping soundly, you can't resist a cheeky peek. And it's perfectly understandable. It's also why our pushchairs come with magnetic peek-a-boo windows.

The gentle, magnetic clasp is much quieter than standard Velcro fastenings, meaning you can check to your heart's content without fear of waking them.

#### Toy Loop

Pushchairs and buggies that are designed to make things easier for parents are great. But they're not the most fun places to spend your time as a little one. So, it tends to reason that any extra flourishes that can bring some fun to those journeys are bound to be a blessing. We've got you covered.

All our own-brand strollers come with a handy toy loop. It lets you attach your child's favourite toy so they can play with them on the go. And because it's a secure loop, there's less chance of them dropping their toy and losing it. Our toy loops keep their favourite friends by their side for the whole journey.

### Handy extras for every eventuality

As well as our range of pushchairs and strollers, we have lots of travel accessories to shop. These include:

#### Carrycots

Perfect for those first six months, Carrycots turn your pushchair into a pram. Offering baby a supportive, protected space to sleep, they come with a flat base to support natural sleeping.

#### Parasols

Protecting your little one from wind, rain and sun, our UPF 50+ parasols offer much-needed shelter whatever the weather, and they can be easily adjusted to suit any angle.

#### Footmuffs

In the colder months, footmuffs are the best way to keep your child warm and toasty. With a variety of styles available, from fleece to cold-weather and extra padded, they're a must-have pushchair accessory.

#### Rain Covers

It's all in the name, rain covers protect your child from getting drenched in a downpour. So, while you push away with water squelching around your toes, can be certain baby is tucked up warm and dry.
