

Summer occasionwear 2026

FATFACE

This summer, the Copper & Black collection features a selection of pieces in collaboration with the V&A museum, continuing our partnership from autumn.

The design team explored their archives and developed the story 'Cabinet of Curiosities' which celebrates the weird and wonderful to build the collection.

Print is key as well as curating an edit that feels collectible and full of real wardrobe treasures. New silhouettes are imagined through expressive maxi dresses, feminine blouses and fluid wide leg trousers. Natural fibres in crafted qualities give depth to the range, complimented with a tight colour palette. Tropic greens work harmoniously with deep sea shots of indigo, with inspiration drawing from treasures found at sea and on land.
