### DESCRIPTION

Test your balance and skill in this Segway experience! Enjoy the adrenaline buzz racing Segways around a natural-terrain rally course with this Segway Rally Adventure for Two experience.

Segways are an exciting mode of transport, they are a self-balancing device, keeping riders upright at all times and are easy to operate. Riders lean their bodyweight in the direction they wish to travel and the futuristic two-wheeled vehicle responds accordingly. The experience begins with a quick registration process and then riders are kitted out in appropriate safety equipment, including a helmet, plus elbow and knee pads.

An instructor-led training session allows individuals to get to grips with the basics of how to manoeuvre their favourite new vehicles. Then, with full confidence gained, it's time to put those new-found Segway skills to the test and take to the track. Riders will enjoy all the twists, turns and various terrains of the rally track while reaching speeds of up to 12.5mph. Depending on your location, you will also receive a souvenir certificate to remind them of their unique and thrilling experience.
