Care for your Wood

Natural wood is a high quality unique finish. In order to keep your product looking at its best please follow the following care instructions. We recommend to protect all surfaces with placemats or coasters, not to place wet or hot products directly on the surface and to keep away from heating or cooling vents.

Cleaning:

Clean with a damp soft cloth only, avoid using harsh chemicals or abrasives as these may damage the surface.
Wipe up any spills immediately.

Maintenance:

Stains may be removed with a light grade sand paper followed by applying a natural bees wax. Note: Slight variations in colour may occur, test on an inconspicuous area first.
