

Installation and Safety Instructions

Easyfit Pendant

Warnings

These instructions are for your safety. Please read through them thoroughly before use and retain them for future reference. If you are in any doubt about installing this product, consult a qualified electrician.

Ensure that your pendant wiring is clamped correctly both in the ceiling and in the lampholder, and that the cable is in good condition. We recommend that it is at least 100mm in length.

IMPORTANT: Always switch off the mains supply during installation or maintenance. We recommend that the fuse is withdrawn or the circuit breaker switched off at the distribution board whilst work is in progress (turning off the light switch is not sufficient). Connection should be via a wall switch to enable safe isolation.

Never fit bulbs of a higher wattage than those specified on the label (as these may cause over heating and damage the fitting).

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or local store for recycling advice.

Clean with a dry cloth only. Do not use liquid or abrasive cleaners on this product.

If you have any doubt about installation/use of this product, consult a qualified electrician.
