WARNING!

Once the feet have been assembled and attached, they should be adjusted to ensure they do not touch the floor (5mm above the floor) to allow for movement once the mattress is placed on the frame.

It is important to note that when moving the bed that it is not dragged into its new position to prevent the possibility of these feet being twisted or angled to one side, which could lead to the collapse of the bed.

To move the bed, remove the mattress and lift the bed into its new position to avoid damage.

Ensure the feet at 90° to the floor before replacing the mattress.
