# Fine Quality Paint

## MATT EMULSION

# LAURA ASHLEY

## SINCE 1953

A high quality water based matt finish emulsion, suitable for interior walls and ceilings.

5 LITRES e

### SURFACE PREPARATION

Surfaces to be painted must be clean, dry and free from grease, dust and dirt. On new plaster or exceptionally porous surfaces a sealer coat of matt emulsion or quality waterbased primer, thinned with around 10% water should first be applied and allowed to dry thoroughly. Highly alkaline surfaces (such as old lime plaster) should be sealed prior to painting by using a proprietary alkali-resisting primer. Old oil based surfaces should first be sanded to provide a key and then primed using a quality water based primer. (N.B. Avoid the inhalation of dust. Wear a suitable dust mask if dry sanding and take special precautions when sanding pre-1960's oil based paint surfaces as they may contain harmful lead). Surface priming with a quality water based primer is generally recommended where there is doubt about the surface to be painted with Laura Ashley Matt Emulsion. Greasy or dirty surfaces should first be washed using a mild detergent or sugar soap and allowed to dry thoroughly.

### APPLICATION

Stir thoroughly before use. Suitable for brush or roller application to internal surfaces such as plaster and stone. For roller application can be diluted with up to 10% water. If more than one can of the same colour is used, ensure the batch numbers are the same or intermix well before use. Two full coats of matt emulsion should be applied to achieve the required colour standard. Coverage approximately 40-50m<sup>2</sup> per 5 litre can depending upon the surface to be painted. Average drying time 1-2 hours. Allow a minimum of 4 hours between coats. Hard dry overnight.

### ENVIRONMENT

EU limit value for this product (Cat A/a): 30g/L (2010). This product contains max 30g/L LOW VOC CONTENT 0.3-7.99% VOC's (Volatile Organic Compounds) contribute to atmospheric pollution. Dispose of contents / container to waste disposal site in accordance with local / national regulation. Do not empty into drains or watercourses.

### PRECAUTIONS

Over coating or "touching in" (patch painting) should be avoided where possible. Due to the dense nature of Laura Ashley Matt Emulsions, care should be taken to avoid scuffing or excessive contact otherwise surface marking could occur. Very dark colours are particularly susceptible to damage. With such colours, surface contact should be kept to an absolute minimum to avoid the possibility of unsightly marking. If a higher level of surface contact is anticipated the use of a similar colour of Laura Ashley Water Based Eggshell should be considered. Seek additional advice before application. Do not use on radiators or other surfaces likely to become very hot.

### CLEANING

After removing as much paint as possible, wash brushes and rollers immediately in cool water. Replace lid firmly after use.

### STORAGE

The product is water based and so must be protected from frost and extreme temperatures. To avoid the risk of spillage, always store and transport in a secure and upright position. Use within 6 months of purchase. The manufacturer cannot accept any responsibility for any deterioration of the product or packaging after this time.

### CLEANING PAINTED SURFACES

Gently wipe soiled areas with a sponge and warm soapy water. Avoid excess local rubbing as this may leave a visible mark when dry. The use of harsh detergents to remove stains is not recommended.
