Fine Quality Paint

EGGSHELL

LAURA ASHLEY

SINCE 1953

A high quality water based eggshell finish emulsion, suitable for internal surfaces and woodwork, providing a tough, washable and easy to maintain surface.

750 ML e

SURFACE PREPARATION Surfaces to be painted must be clean, dry and free from grease, dust and dirt. Old oil based surfaces should first be sanded to provide a key and then primed using a quality water based primer. (P.B. Avoid the inhalation of dust. Wear a suitable dust mask if dry sanding and take special precautions when sanding pre-1960's oil based paint surfaces as they may contain harmful lead). Surface priming with a quality water based primer is generally recommended where there is doubt about the surface to be painted with Laura Ashley Water Based Eggshell. Greasy or dirty surfaces should first be washed using a mild detergent or sugar soap and allowed to dry thoroughly.

APPLICATION Stir thoroughly before use. Suitable for brush or roller application. If more than one can of the same colour is used, ensure the batch numbers are the same or intermix well before use. Two full coats of waterbased eggshell should be applied to achieve the required colour standard. Coverage approximately 10ml² per 750ml can depending upon the surface to be painted. Average drying time 2-3 hours. Allow a minimum of 12 hours between coats. Allow the coating to fully harden for 7 days before normal use to ensure resistance to knocks and bumps. **PRECAUTIONS** Not suitable for high wear surfaces like shelves, worktops and kitchen surfaces. Water based eggshells do not flow out in the same way as traditional oil based products so over-spreading should be avoided. For best results, use a good quality brush, load well and brush out evenly. Lay off quickly and avoid coating surfaces that are partly dry. If using a roller, use a short pile roller to avoid excessive feathering. Do not use on radiators or other surfaces likely to become very hot.

CLEANING After removing as much paint as possible, wash brushes and rollers immediately in cool water. Replace lid firmly after use. **STORAGE** The product is water based and so must be protected from frost and extreme temperatures. To avoid the risk of spillage, always store and transport in a secure and upright position. Use within 6 months of purchase. The manufacturer cannot accept any responsibility for any deterioration of the product or packaging after this time.

CLEANING PAINTED SURFACES Gently wipe soiled areas with a sponge and warm soapy water. Avoid excess local rubbing as this may leave a visible mark when dry. The use of harsh detergents to remove stains is not recommended. **ENVIRONMENT** EU limit value for this product (Cat A) is: 350g/L (200). This product contains max 30g/L LOW VOC CONTENT (0.3-7.9% VOC's (Volatile Organic Compounds) contribute to atmospheric pollution. Dispose of contents / container to waste disposal site in accordance with local / national regulation. Do not empty into drains or watercourses.
