Instructions for safe use	Shake well before use. Gently tilt the bottle and tap the base to dispense 5-6 drops into the palm of your hand. Apply to mid-lengths and ends of towel dried hair. Short, fine, or unprocessed hair may require fewer drops. Long, coarse, or heavily processed hair may require more. Start with a smaller amount and add more as needed. Use every 2-3 washes to restore the hair's lipid layer. Very dry or damaged hair can use more frequently. If ends feel particularly dry, 1-2 drops can be smoothed through hair after styling. Can also be applied to dry hair and left overnight, then shampooed out in the morning.
Product Expiry	12 Months
