

Hello Hello!

This new-fangled Reed Diffuser Thingy provides a brand new way to enjoy the Splendid Scents created by Lily-Flame.

The reeds absorb the fragrance and then diffuse it into the air continuously. You can set it up once and forget about it.

Just place the reeds into the bottle and allow them to absorb the scent. After an hour or two, turn the reeds upside down to let the other end to do the same. That's it! Every so often, if you fancy an extra burst of fragrance just turn the reeds upside down again and they'll work even better.

One of the great things about Our Reed Diffusers is that, because there's no flame, you can leave them unattended. But it's not all beer and skittles you know- Do make sure to keep it out of the reach of children, animals and naked flames. and however tempting it may be, Do Not drink the scent! We hope you enjoy it. If you'd like to get in touch, do feel free!
